

Special Issue on Uterine Diseases

Call for Papers

The **uterus**, or womb, is an important female reproductive organ. It is the place where the fetus develops when a woman is pregnant. Uterine diseases have become a big threat to women's health. The first sign for a uterine disease may be bleeding between periods or after sex. Some pathological states include: endometritis, endometriosis, uterine polyp, uterine fibroid, prolapse of the uterus, pyometra, uterine malformations, and Asherman's syndrome. Abortion, uterine cavity operations and infections may result in uterine disease. As a common group of female diseases, uterine diseases are of great attractions to researchers. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **uterine diseases**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **uterine diseases**. Potential topics include, but are not limited to:

- Female reproductive organ
- Uterine malformations
- Endometriosis
- Endometritis
- Uterine fibroid
- Prolapse of the uterus
- Abortion

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue – Uterine Diseases**" should be chosen during your submission.

According to the following timetable:

Submission Deadline	April 22nd, 2015
Publication Date	June 2015

Guest Editor:

Scientific Research
Open Access

**Open Journal of
Obstetrics and Gynecology**
ISSN Online: 2160-8806
