

Special Issue on Infertility and Treatments

Call for Papers

As for a woman, infertility means she is unable to conceive as well as being unable to carry a pregnancy to full term. Infertility may be due to a single cause in either the woman or her partner, or a combination of factors. About 15 percent of couples are unable to get pregnant after one year of having unprotected sex, mostly due to an increase in age.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Infertility and Treatments**. Potential topics include, but are not limited to:

- Fallopian tube surgery
- Laparoscopic surgery
- Intrauterine insemination (IUI)
- In-vitro fertilisation (IVF)
- Complications of infertility treatment
- Surgical procedures
- Medical treatment

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Infertility and Treatments**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	January 6th, 2016
Publication Date	March 2016
