## Special Issue on Female Reproductive System

### Call for Papers

The female reproductive system can be classified into two parts: the internal reproductive organs, which includes the vagina, uterus, uterine tubes and ovaries; the external components, which includes mons pubis, perineum, clitoris, labia, Bartholin's glands, pudendal cleft, and periurethral area. They act together, playing a vital part in the reproduction process.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Female Reproductive System**. Potential topics include, but are not limited to:

- Amenorrhea
- Bacterial vaginosis
- Breast cancer
- Cervical cancer
- Dysmenorrhea
- Ectopic pregnancy
- Ovarian cancer
- Ovarian cysts
- Polycystic ovary syndrome
- Toxic shock syndrome
- Trichomonas vaginalis
- Uterine cancer
- Vaginitis
- Vulvovaginitis
- Yeast infection

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Female Reproductive System**” should be selected during your submission.

Special Issue Timetable:

**Scientific Research**  
*Open Access*

## **Open Journal of Obstetrics and Gynecology**

**ISSN Online: 2160-8806**
