

Special Issue on Uterus and Related Diseases

Call for Papers

The uterus is part of the female reproductive organs, and is the place where the fetus grows. Various lesions in the uterus are one of the most common diseases in women, such as inflammation, injury, tumor and precancerous lesions of the uterus. Uterine diseases mainly include endometritis, endometriosis, uterine Hypertrophy, uterine fibroids, uterine cysts, uterine prolapse and endometrial cancer. The causes of uterine diseases include abortion, intrauterine operation, infection, etc.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **uterus and related diseases**. Potential topics include, but are not limited to:

- Endometritis
- Hysteromyoma
- Uterine infection
- Endometriosis
- Uterine cyst
- Uterine prolapse
- Uterine cancer
- Pathogenic infection in uterus
- Clinical treatment and diagnosis of uterine diseases

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Uterus and Related Diseases**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	February 27th, 2018
Publication Date	April 2018
