

Special Issue on
Infections and Surgical Problems in Pregnancy
Call for Papers

In pregnancy, there is an increased susceptibility and/or severity of several infectious diseases. There are several potential risk factors or causes to this increased risk including an increased immune tolerance in pregnancy, maternal physiological changes, etc. Pregnant women are more severely affected by influenza, hepatitis E, herpes simplex and malaria.

Surgery is different in pregnancy than in the nonpregnant state and there are risk factors for well-being of the fetus. Surgical problems in pregnancy should be carefully treated.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **infections and surgical problems in pregnancy**. Potential topics include, but are not limited to:

- Mother-to-child transmission disease
- Infectious disease in pregnancy
- HIV infection during pregnancy
- Inflammatory bowel disease
- Ovarian and cervical surgery
- Management of ectopic pregnancy
- Safe abortion
- Cancer treatment during pregnancy
- Other major trauma

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Infections and Surgical Problems in Pregnancy**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	October 21st, 2020
