

Special Issue on High Risk Pregnancy

Call for Papers

"High Risk Pregnancy" is an academic topic that focuses on the identification, management, and outcomes of pregnancies that carry an increased risk for maternal or fetal complications. It involves studying factors such as maternal age, pre-existing medical conditions, multiple pregnancies, genetic disorders, and gestational complications that may impact the health of the mother or baby. Research in this field aims to understand risk assessment, develop effective interventions, and improve outcomes for both the mother and the developing fetus in high-risk pregnancy situations.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **High Risk Pregnancy**. Potential topics include, but are not limited to:

- Medical complications
- Maternal-fetal medicine
- Obstetric interventions
- Fetal development and genetics
- Quality improvement in high-risk obstetrics
- Risk factors and prevention
- Obesity and pregnancy
- Preeclampsia
- Hypertensive disorders in pregnancy
- Gestational diabetes
- Ectopic pregnancy
- Preterm birth and prematurity
- Multiple births
- Fetal abnormalities and disorders
- Maternal and neonatal outcomes

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue – High Risk Pregnancy**" should be chosen during your submission.

According to the following timetable:

Submission Deadline	January 25th, 2024
Publication Date	March 2024

For publishing inquiries, please feel free to contact the Editorial Assistant at submission.entrancel@scirp.org
