

Special Issue on Cataract

Call for Papers

A cataract is a clouding of the lens in the eye leading to a decrease in vision, which is the most common cause of vision loss in people over age 40. The symptoms of early cataract may be treated with new eyeglasses, brighter lighting, anti-glare sunglasses, or magnifying lenses. If these measures fail to help, surgery is the only effective treatment.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **cataract**. Potential topics include, but are not limited to:

- Subcapsular cataract
- Nuclear cataract
- Cortical cataract
- Cataract symptoms and signs
- Cataract prevention
- Cataract treatment
- Cataract surgery

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Cataract**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	December 22nd, 2017
Publication Date	February 2018
