

Special Issue on Schizophrenia

Call for Papers

Schizophrenia is one of the most common mental illnesses, usually appears in early adulthood or late adolescence. The people with schizophrenia may have such symptoms as false beliefs, confused thinking, auditory hallucinations, etc. The causes for schizophrenia are multiple. Genetic and environment factors are believed to play the vital part and act together to cause schizophrenia.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Schizophrenia**. Potential topics include, but are not limited to:

- Disorganized schizophrenia
- Catatonic schizophrenia
- Paranoid schizophrenia
- Signs and symptoms
- Causes (genetic and environmental factors, etc.)
- Diagnostic criteria
- Schizoaffective disorder
- Prevention
- Schizophrenia treatments
- Dopamine theory of schizophrenia

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Schizophrenia**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	November 30th, 2015
Publication Date	January 2016
