

## Special Issue on Biostatistics

### Call for Papers

Biostatistics is a branch of statistics that focuses on the application of statistical methods to biological and health-related research. It involves the collection, analysis, interpretation, and presentation of data to support evidence-based decision making in medical and public health fields. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Biostatistics**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Biostatistics**. In this special issue, potential topics include, but are not limited to:

- Clinical trials
- Infectious disease modeling
- Big data in biology and medicine
- Clinical statistics
- Basic medical statistics
- Health statistics
- Statistical processes in pharmaceutical research
- Statistical concepts in biology and health sciences
- Applications in biology and medicine

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Biostatistics**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	May 9th, 2024
Publication Date	July 2024
