

Special Issue on Engineering Statistics

Call for Papers

Engineering statistics refers to the application of statistical methods and techniques in the field of engineering. It involves the collection, analysis, interpretation, presentation, and prediction of data to support decision-making and problem-solving in various engineering disciplines. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Engineering Statistics**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Engineering Statistics**. In this special issue, potential topics include, but are not limited to:

- Experimental design
- Reliability analysis
- Quality control and process improvement
- Risk analysis
- Data analysis and modeling

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Engineering Statistics**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	May 25th, 2024
Publication Date	July 2024
