

Special Issue on Biophotonics

Call for Papers

Biophotonics exists at the intersection of the disciplines of life sciences and physical sciences. It embraces all light-based technologies and has become an essential tool in life sciences and medicine. Furthermore, it reaches into the fields of food safety inspection, water quality analysis, environmental monitoring, pharmaceutical analysis and agricultural science. Biophotonics industry has developed rapidly accounting for more than 50 billion dollars per year of global market share due to continuous market demand.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **biophotonics**. Potential topics include, but are not limited to:

- Biophotonics optical and life science
- Biophotonics techniques for structural and functional imaging
- Novel biophotonics techniques and applications
- Biophotonics & medical technology
- Biophoton detection and low-intensity light therapy
- Photobiomodulation and photodynamic therapy

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Biophotonics**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	November 30th, 2017
Publication Date	January 2018
