

Special Issue on Laser Technology and Its Applications

Call for Papers

The laser has become more and more important in scientific research and industrial applications. Now, the laser wavelength can cover the range from ultraviolet to terahertz and output laser performance has significantly progressed in recent years. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **laser technology and its applications**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **laser technology and its applications**. In this special issue, potential topics include, but are not limited to:

- Developments in new optical materials
- Laser physics
- Quantum optics
- Developments in optoelectronic devices and photonics
- Laser technology: trends & future
- Development in all types of lasers
- Applications of laser

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Laser Technology and Its Applications**” should be chosen during your submission.

According to the following timetable:

| | |
|---------------------|----------------|
| Submission Deadline | May 21st, 2021 |
| Publication Date | July 2021 |
