

## Special issue on Microbial medicine

### Call for Papers

Increasing evidence indicates that the complex microbial ecosystem of the human intestine plays a critical role in protecting the host against disease. Studies about Microbial medicine may involve discussing cure or new progress for severe disease (e.g., define a state of imbalance in the gut microbial ecosystem, replacement therapies as a future treatment modality). Instead of traditional medicine cure, microbial medicine based in Microbial Ecosystem Therapeutics (MET), any useful creative revolution in these part would be welcomed in our journals.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Microbial medicine**.

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission, Prospective authors should submit an electronic copy of their complete manuscript through the journal [Paper Submission System](#).

Please kindly notice that the "Special Issue" under your manuscript title is supposed to be specified and the research field "Special Issue- *Microbial medicine*" should be chosen during your submission.

According to the following timetable:

Manuscript Due	June 19th, 2013
Publication Date	August 2013
