

Special Issue on Pharmacology & Therapeutics

Call for Papers

Pharmacology & Therapeutics is a scientific discipline focusing on the study, discovery, and characterization of chemicals that interact with biological systems. It aims to understand how drugs work at a molecular and cellular level to influence human physiology and pathology. This field combines knowledge from biology, chemistry, and medicine to develop new therapeutic agents, improve existing treatments, and elucidate the mechanisms through which drugs exert their effects, ultimately contributing to advancing healthcare and patient outcomes.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Pharmacology & Therapeutics**. Potential topics include, but are not limited to:

- Clinical pharmacology
- Molecular pharmacology & therapeutics
- Drug toxicology and safety pharmacology
- Neuropharmacology and neurological disorder
- Pharmacogenomics and personalized medicine
- Pharmacokinetics and Pharmacodynamics
- Regenerative pharmacology
- Psychopharmacology
- Cardiovascular pharmacology
- Oncopharmacology
- Innovative therapies

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Pharmacology & Therapeutics**” should be chosen during your submission.

According to the following timetable:

| | |
|---------------------|-----------------|
| Submission Deadline | June 17th, 2024 |
| Publication Date | August 2024 |
