

Special Issue on Social Behavior and Psychology

Call for Papers

Social Behavior and Psychology is the study of how individuals' thoughts, feelings, and behaviors are influenced by social interactions. It examines the dynamics of human behavior within social groups, including topics such as conformity, obedience, aggression, and attraction. This field seeks to understand how societal norms, cultural influences, and interpersonal relationships shape individuals' attitudes and actions. Through empirical research methods, social behavior and psychology aim to uncover the underlying mechanisms that drive human social behaviors.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Social Behavior and Psychology**. Potential topics include, but are not limited to:

- Social perception, cognition and behavior
