

Special Issue on Vascular Surgery

Call for Papers

Vascular surgery is a branch of surgery that diagnoses and repairs damaged or diseased blood vessels, arteries and veins. It is usually managed by medical therapy, minimally-invasive catheter procedures, and surgical reconstruction. The specialty evolved from general and cardiac surgery as well as minimally invasive techniques pioneered by interventional radiology.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Vascular Surgery**. Potential topics include, but are not limited to:

- Angiography
- Angioplasty and stenting
- Cardiopulmonary bypass
- Carotid endarterectomy
- Endoscopic vein surgery
- Endovascular stent graft
- Phlebectomy
- Thrombectomy

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Vascular Surgery**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	November 10th, 2016
Publication Date	January 2017
