TABLE OF CONTENTS

Volume 2 Number 2 May 2012

The Inconsistency of the Quadratic Mincer Equation: A Proof
S. S. Hamlen, W. A. Hamlen.................................................................115

Lower Hemi-Continuity, Open Sections, and Convexity:
Counter Examples in Infinite Dimensional Spaces
A. Bagh.........................................................................................121

Profit-Sharing and the Endogenous Order of Moves in Oligopoly
H. Takami, T. Nakamura..................................................................125

Impact of Sex on Worker’s Effort within Efficiency Wage Setting
P. R. A. Loureiro, J. Orri llo, T. B. S. Moreira........................................130

The Economic Dynamics of Inflation and Unemployment
T. Todorova..................................................................................133

Implications of an Aging Population on Pension Systems and Financial Markets
T. Nguyen, R. Stüzle........................................................................141

Stationary Vector Autoregressive Representation of Error Correction Models
Y.-Y. Kim......................................................................................152

On the Consistency of the First-Order-Approach to Principal-Agent Problems
Ó. Gutiérrez..................................................................................157

Qualitative Economics—A Perspective on Organization and Economic Science
M. Fast, W. Clark II........................................................................162

Call Auction Markets with Risk-Averse Specialists
P. Vitale.......................................................................................175

The Role of Money: Credible Asset or Numeraire?
M. Otaki.......................................................................................180

Nature and Development of Econophysics: A Short Report
P. Di Sia.......................................................................................183

Education and Electoral Outcomes
D. Mukherjee, R. Mallik.................................................................186

Hyperbolic Transformation and Average Elasticity in the Framework of
the Fixed Effects Logit Model
Y. Kitazawa..................................................................................192

Technology Intensity and the World Distribution of Income
C.-P. Lo, G.-J. Fann.......................................................................200
Credit, Externalities, and Nonoptimality of the Friedman Rule
K. Kobayashi, M. Inaba, K. Nutahara ............................................................. 203

Playing the Deficit Gamble Easily
K. Tamegawa ...................................................................................... 209

Prize Allocation in Contests with Size Effect through Prizes
S. Lee, S. Y. Lee ............................................................................... 212

A Preliminary Investigation of the Optimal Percentage Requirement in an Electricity Market with Tradable Green Certificates
K. M. Currier, S. Rassouli-Currier ...................................................... 216

Note on a Continuum Multi-Country and International Trade
K. Kamei ......................................................................................... 221

Revisiting the Effects of Economic Incentives on Motivation
K. Petrova ......................................................................................... 226

The Policy Role in the Stock Markets
M. Alghalith, E. Ramlogan, M. Franklin ................................................ 230

PRODUCTION INFORMATION

For manuscripts that have been accepted for publication, please contact:
E-mail: tel@scirp.org
Theoretical Economics Letters (TEL) seeks high quality short papers in all topics in economic theory and mathematical economics. It also considers papers that empirically or experimentally test existing theories or assumptions. In addition, there is a section for work-in-progress, limited to one page.

Subject Coverage
All manuscripts must be prepared in English, and are subject to a rigorous and fair peer-review process. Accepted papers will immediately appear online followed by printed hard copy. The journal publishes original papers including but not limited to the following fields:

- Econometric theory
- Experimental and behavioral economics
- Macroeconomic theory
- Mathematical economics
- Mathematical finance
- Microeconomic theory

We are also interested in: 1) Short Reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book Reviews—Comments and critiques.

Notes for Intending Authors
Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.
