

Special Issue on Experimental Economics

Call for Papers

Experimental economics is a discipline within economics that use experimental methods to study phenomena that are difficult to observe directly in naturally occurring economic contexts. Data collected in experiments are used to estimate effect size, test the validity of economic theories, and illuminate market mechanisms.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Experimental Economics**. Potential topics include, but are not limited to:

- Auctions
- Bargaining
- Cognitive abilities and economic behavior
- Decision making
- Economic games
- Economic theory
- Experimental finance
- Field experiments

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - *Experimental Economics***” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	July 20th, 2017
Publication Date	August 2017
