

Special Issue on Financial Derivatives

Call for Papers

In finance, a **derivative** is a contract that derives its value from the performance of an underlying entity. Derivatives can be used for a number of purposes, including insuring against price movements, increasing exposure to price movements for speculation or getting access to otherwise hard-to-trade assets or markets.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **financial derivatives**. Potential topics include, but are not limited to:

- Hedging
- Credit default swap
- Futures
- Mortgage-backed securities
- Economic function of the derivative market
- Market and arbitrage-free prices
- Counter party risk

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Financial Derivatives**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	December 7th, 2017
Publication Date	February 2018
