

Special Issue on Financial Economics

Call for Papers

Financial economics is the branch of economics characterized by a "concentration on monetary activities", in which "money of one type or another is likely to appear on both sides of a trade". Its concern is thus the interrelation of financial variables, such as prices, interest rates and shares, as opposed to those concerning the real economy. It has two main areas of focus: asset pricing and corporate finance; the first being the perspective of providers of capital, i.e. investors, and the second of users of capital. It thus provides the theoretical underpinning for much of finance.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Financial Economics**. Potential topics include, but are not limited to:

- Quantitative methods
- Financial modeling
- Mathematical finance
- Behavioral economics and finance
- General equilibrium theory
- Asset pricing
- Investment theory
- Portfolio theory
- Public finance
- Econometrics
- International economics and finance
- Financial markets
- Capital markets
- Economics of money and banking
- Corporate finance
- Risk management
- Decision making under uncertainty

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue – Financial Economics**" should be chosen during your submission.

According to the following timetable:

Submission Deadline	June 16th, 2023
Publication Date	August 2023
