

Special Issue on Financial Innovation and Technology

Call for Papers

Financial Innovation and Technology is an academic field that examines the intersection of finance and technology, focusing on the development, adoption, and implications of innovative financial tools and technological advancements in the financial sector. Researchers in this field explore topics such as digital currencies, blockchain technology, robo-advisors, mobile banking, and financial analytics. They analyze the impact of these innovations on financial markets, risk management, regulatory frameworks, and consumer behavior, aiming to understand and harness the potential benefits and challenges of the evolving financial landscape.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Financial Innovation and Technology**. Potential topics include, but are not limited to

- Financial innovation and economic growth
- Fintech startups and entrepreneurship
- Blockchain technology and cryptocurrencies
- Artificial intelligence and machine learning in finance
- Regulatory technology (regtech) solutions
- Digital banking and payments
- Big data analytics and financial services
- Robo-advisory and automated investing
- Cybersecurity and financial systems
- Financial inclusion and innovation
- Regulatory and policy implications
- Financial innovation and economic growth
- Financial innovation and monetary policy
- Competition, technology and innovation

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Financial Innovation and Technology**” should be chosen during your submission.

According to the following timetable:

Scientific Research
