

## Special Issue on Mechatronics Engineering Research

### Call for Papers

**Mechatronics engineering** is the design of computer-controlled electromechanical systems. It can be assumed that mechatronics is an interdisciplinary field of science and technology, dealing with general problems of mechanics, electronics and informatics. The goal of this Special Issue is to provide a platform for scientists worldwide to promote, share, and discuss various new issues and developments in the area of mechatronics engineering research.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **mechatronics engineering research**. Potential topics include, but are not limited to:

- Mechatronics modeling
- Mechatronics design
- Mechatronics control systems
- Mechatronics techniques
- Mechatronics instrumentation
- Mechatronics and robotics
- System dynamics
- Applications

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Mechatronics Engineering Research**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	June 23rd, 2016
Publication Date	August 2016
