

## Special Issue on Textile Engineering

### Call for Papers

Textile Engineering research focuses on the comprehensive study and advancement of textile production, materials, processes, and related technologies. It involves investigating the design, development, and optimization of textile fibers, yarns, fabrics, and finished products. The goal of this special issue is to provide a platform for scientists and academics all over the world to promote, share and discuss various new issues and developments in **Textile Engineering**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Textile Engineering**. In this special issue, potential topics include, but are not limited to:

- Fiber Science
- Yarn Formation
- Fabric Construction
- Textile Chemistry
- Textile Physics
- Textile Machinery and Equipment
- Textile Testing and Quality Control
- Smart Textiles
- Environmental Impact and Sustainability

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Textile Engineering**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	August 20th, 2024
Publication Date	October 2024
