TABLE OF CONTENTS
Volume 3, Number 2, May 2013

Focal neurological deficit in acute anemia: Case reports and review of the literature

Cholinesterase inhibitors for co-morbid Alzheimer’s disease dementia and schizophrenia: Systematic review and meta-analysis
V. R. Badrakalimuthu.................................................................57

The psychophysics of a human brain subjective activity
E. A. Yumatov........................................................................61

Acute statin treatment improves recovery after experimental intracerebral hemorrhage
D. M. Yang, J. F. Zhang, Y. X. Han, E. James, M. Chopp, D. M. Seyfried.................................................................69

Molecular signaling of 5-HT1A and presence of serotonergic cells in the fetal cerebral cortex
A. B. M. de Oca, G. M. Gutiérrez, J. H. Rodríguez.................................................................76

Helplessness-like escape deficits of NIH-HS rats predict passive behavior in the forced swimming test:
Relevance for the concurrent validity of rat models of depression
M. Palència, S. Díaz-Morán, C. Mont-Cardona, T. Cañete, G. Blázquez, E. Martínez-Membrives, R. López-Aumatell,
A. Tobeña, A. Fernández-Teruel........................................................................83

Outcome following severe traumatic brain injury TBI correlates with serum S100B but not brain extracellular fluid S100B: An intracerebral microdialysis study
C. D. Winter, G. F. Clough, A. K. Pringle, M. K. Church.................................................................93

Non-peptide ligands in the characterization of peptide receptors at the interface between neuroendocrine and mental diseases
M. Pissarek, U. Disko..................................................................100

JC virus: A brief review
B. V. Ramírez, V. C. Palacio........................................................126

The figure on the front cover is from the article published in World Journal of Neuroscience, 2013, Vol. 3, No. 2, pp. 76-82 by Alfonso Boyzo Montes de Oca, et al.

PRODUCTION INFORMATION

For manuscripts that have been accepted for publication, please contact:
E-mail: wjns@scirp.org
World Journal of Neuroscience (WJNS) is an international journal dedicated to the latest advancement of Neuroscience. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of Neuroscience. All manuscripts must be prepared in English, and are subject to a rigorous and fair peer-review process. Accepted papers will immediately appear online followed by printed hard copy. The journal publishes original papers including but not limited to the following fields:

- Behavioral neuroscience
- Cellular neuroscience
- Clinical neuroscience
- Cognitive neuroscience
- Computational neuroscience
- Developmental neuroscience
- Molecular neuroscience
- Neuroengineering
- Neuroimaging
- Neurolinguistics
- Systems neuroscience

What is SCIRP?
Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science, by delivering superior scientific publications and scientific information solution provider that enable advancement in scientific research.

What is Open Access?
All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, world-wide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

• High visibility for maximum global exposure with open access publishing model
• Rigorous peer review of research papers
• Prompt faster publication with less cost
• Guaranteed targeted, multidisciplinary audience
