Wireless Sensor Network (WSN)

Call for Papers

http://www.scirp.org/journal/wsn ISSN 1945-3078 (Print) ISSN 1945-3086 (Online)

WSN is an international refereed journal dedicated to the latest advancement of wireless sensor network and applications. The goal of this journal is to keep a record of the state-of-the-art research and promote the research work in these areas.

🗇 Editors-in-Chief

Prof. Kosai Raoof Prof. Min Song University of Maine, France The University of Toledo, USA

Subject Coverage

This journal invites original research and review papers that address the following issues in wireless sensor networks. Topics of interest are (but not limited to):

• Data Fusion and Dynamic Inference of Network Information	 QoS Issues in WSN-Based Integrated Networks
Integration of Sensor Networks and Web-Based Services	 Reliability of Sensor Network and Failure Analysis
Interconnection Architecture Aspects	 Routing Protocols for Cross Networks
Location and Time Services	 Sensor Network for Smart Grid
Network and Transport Layer Protocols for Cross Networks	 Sensor Tasking, Control and Actuation
New Applications of Sensor Network: Environmental	 Sensor Technology
Monitoring, Healthcare, Home Automation	 Testbeds for Integrated Networks

We are also interested in short papers (letters) that clearly address a specific problem, and short survey or position papers that sketch the results or problems on a specific topic. Authors of selected short papers would be invited to write a regular paper on the same topic for future issues of the WSN.

Solution Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. Authors are responsible for having their papers checked for style and grammar prior to submission to WSN. Papers may be rejected if the language is not satisfactory. For more details about the submissions, please access the website.

What is SCIRP?

Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science with its publication.

What is Open Access?

Art and Design Review

Advances in

dvances in Biological bemistry Entomolog

Applied Mathematics

Engineering

UNIT O

All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, worldwide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

• High visibility for maximum global exposure with open access publishing model

Soft

ĥh

- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
