

Innovative education is education with the basic value orientation of cultivating people's creative spirit and innovative ability. Its core is to focus on researching and solving the problem of how to cultivate the innovative consciousness, innovative spirit and innovative ability of primary and secondary school students in the field of basic education on the basis of universal nine-year compulsory education and in the process of comprehensive implementation of quality education to meet the challenges of the knowledge economy era.

In the present book, fifteen typical literatures about Innovative education published on international authoritative journals were selected to introduce the worldwide newest progress, which contains reviews or original researches on Innovative education. We hope this book can demonstrate advances in Innovative education as well as give references to the researchers, students and other related people.
