

Contents

Part 1 Carbon and Its Different Forms

Chapter 1.1 Introduction.....	3
1. Carbon Nanotubes-Polymer Nanocomposites.....	7
2. Applications of Nanocarbon Polymer Composites.....	8
3. Future Perspectives on Nanocarbon Polymer Composites in Nanoscience.....	12
4. Processing and Tailoring.....	12
References.....	16
Bibliography.....	17
Chapter 1.2 Carbon.....	19
1. Elemental Carbon.....	19
2. Graphite.....	20
3. Graphitic Materials.....	21
4. Whiskers of Graphite.....	22
5. Fibres of Carbon.....	23
6. Glassy Carbon.....	26
7. Carbon Blacks.....	29
8. Carbon Coated Carbide Particles.....	33
9. Carbynes.....	35
10. Carbolites.....	38
11. Amorphous Carbon.....	39
12. Porous Carbons.....	41
13. Liquid Carbon.....	44
14. Graphite Intercalation Compounds.....	45
15. Diamond.....	48
16. Other Diamond Materials.....	52

16.1. Chemical Vapor Deposited Diamond Films.....	52
16.2. Diamond-Like Carbon Films.....	54
17. Diamond-Like and Cage Hydrocarbon Molecules.....	55
18. Synthesis of a Fully Unsaturated, All-Carbon Polymer.....	59
19. Metallo-Carbohedrenes (Met-Cars).....	61
20. Carbon-Free Fullerenes.....	65
21. Metal-Coated Fullerenes.....	66
References.....	69
Bibliography.....	79

Part 2 Properties of Nanotubes

Chapter 2.1 Transport Properties.....	83
1. Quantum Transport in a One-Dimensional Wire.....	83
1.1. A Ballistic Conductor ($L \ll L_m, L_\varphi$).....	88
1.2. Classic Transport, $L_\varphi \ll L_m \ll L$	93
1.3. Universal Conductance Fluctuations.....	97
1.4. Negative Magnetoresistance.....	101
2. Transport Experiments on Carbon Nanotubes.....	102
2.1. Attaching Contacts.....	103
2.2. An Individual Single-Wall Nanotube.....	105
2.3. An Individual Rope of Single-Wall Nanotubes.....	110
2.4. Magneto-Transport in Multi-Wall Nanotubes.....	111
References.....	116
Bibliography.....	117
Chapter 2.2 Mechanical Properties of Carbon Nanotubes.....	119
1. Introduction.....	119

2. Theoretical Investigations.....	120
2.1. Some Concepts in Mechanical Properties: Stiffness, Strength and Fracture Toughness.....	120
3. Computational Investigations.....	121
3.1. Young’s Modulus.....	121
3.2. Poisson Ratio.....	124
3.3. Deformation of CNTs under Stress.....	125
4. The Answer of Experiments.....	127
5. Composites Reinforced With CNTs.....	129
6. Conclusion.....	131
References.....	131
Bibliography.....	135

Part 3 Recent Developments

Chapter 3.1 Polylactic Acid/Carbon Nanotube Composites.....	139
1. Introduction.....	139
2. Enhancement of Dispersion of CNTs in PLA Matrix.....	140
3. Thermal Properties.....	142
4. Mechanical Properties.....	147
5. Electrical Properties.....	151
6. Rheological Properties.....	154
7. Other Properties.....	155
8. Applications.....	158
9. Conclusion.....	158
References.....	159
Bibliography.....	169

Chapter 3.2 Multiwalled Carbon Nanotube Based Polystyrene and Toughened Polycarbonate Nanocomposites.....	171
1. Introduction.....	171
2. Materials and Methods.....	174
2.1. Materials.....	174
2.2. Methods.....	174
3. Results and Discussion.....	176
3.1. Morphological Characterization.....	176
3.2. Electromagnetic Interference Shielding (EMI SE) of Nanocomposites.....	180
4. Conclusion.....	182
References.....	183
Bibliography.....	187
Chapter 3.3 Novel Functionalized Carbon Nanotubes.....	189
1. Introduction.....	189
2. Experimental.....	190
2.1. Materials.....	190
2.2. Functionalization of MWCNTs.....	191
2.3. Characterization of F-MWCNTs.....	192
2.4. Preparation of PES/F-MWCNTs Blend Membranes.....	192
2.5. Characterization of PES/F-MWCNT Blend Membranes.....	194
2.6. Filtration Performance and Fouling Analysis.....	194
3. Results and Discussion.....	196
3.1. Characteristics of F-MWCNTs.....	196
3.2. Characteristics of PES/F-MWCNT Membranes.....	199
3.3. Membrane Performance.....	206
4. Conclusion.....	210
References.....	210

Bibliography.....	215
Chapter 3.4 Piezoresistive Strain Sensors.....	217
1. Introduction.....	217
2. Electrical Conductivity of CNT/Polymer Nanocomposites.....	218
3. Piezo Resistivity of CNT/Polymer Nanocomposites.....	234
4. Conclusion.....	240
References.....	241
Bibliography.....	252
Chapter 3.5 Co₃O₄-CNT Nanocomposites.....	253
1. Introduction.....	253
2. Results and Discussion.....	255
3. Conclusions.....	264
4. Experimental.....	265
4.1. Chemicals and Apparatus.....	265
4.2. Catalyst Preparation.....	266
4.3. General Procedure for the Synthesis of Polyhydroquinolines.....	266
References.....	266
Bibliography.....	271
Chapter 3.6 Bridged Carbon Nanotube-Based Mass Detectors.....	273
1. Introduction.....	273
2. Modeling of a CNT-Based Nano-Sensor with Complex-Shaped Deposited Particles.....	277
3. Impacts of the Complex-Shaped Deposited Particle on the Linear Characteristics of the Nano-Sensor.....	283
4. Mechanical Properties of Carbon Nanotubes with Various Chiral Angles.....	286
5. CNT-Based Nano-Sensor: Impacts of the Complex-Shaped Deposited Particles.....	289

5.1. Impact of the Aspect Ratio on the Natural Frequencies of the Nano Sensor.....	290
5.2. Impacts of Particle Size and Mass on the Natural Frequencies and Mode Shapes of the Nano-Sensor.....	294
5.3. Impacts of the Nonlocal Parameter on the Natural Frequencies and Mode Shapes of the Nano-Sensor.....	299
6. Conclusions.....	303
References.....	304
Bibliography.....	308

Chapter 3.7 Magnesia Tuned Multi-Walled Carbon

Nanotubes-Reinforced Alumina Nanocomposites.....309

1. Materials and Experimental Procedures.....	310
1.1. Sample Preparation.....	310
1.2. Density Measurement and Structural Characterisation.....	312
1.3. Mechanical Testing.....	313
2. Results and Discussion.....	315
2.1. Dispersion and Stability of MWCNTS.....	315
2.2. Densification and Structural Features.....	317
2.3. Grain Size Analysis and Fractography.....	320
2.4. Mechanical Properties.....	325
3. Conclusions.....	330
References.....	330
Bibliography.....	334

Chapter 3.8 Delivery of Drugs and Biomolecules Using Carbon

Nanotubes.....335

1. Introduction.....	335
2. Drug Delivery Systems.....	337

2.1. Current drug Delivery Systems.....	337
2.2. CNTs as a drug Delivery System.....	340
3. Delivery of Drugs.....	344
3.1. Anticancer Drugs.....	344
3.2. Delivery of Other Drugs.....	352
4. Delivery of Biomolecules.....	356
4.1. DNA and RNA.....	356
4.2. Proteins.....	362
5. Cytotoxicity of CNTs.....	367
5.1. Factors Affecting the Cytotoxicity of CNTs.....	368
5.2. Cytotoxicity Mechanisms of CNTs.....	369
6. Conclusion.....	370
References.....	371
Bibliography.....	388
