

# Preface

The human understanding of the universe and scientific development rely on new knowledge continuous accumulation. Much old knowledge has been gradually overthrown. Einstein's "general relativity" completely changed people discussion direction of the origin and destination of the universe, but Einstein only won the Nobel Prize once. in fact, the reason is very simple, At that time, the Nobel Prize judges were unable to understand Einstein's published papers, so they were unable to evaluate Einstein's papers. And the judges could not to prove that Einstein's conclusions were right or wrong at that time. Now Nobel Prize winners have won the Nobel Prize because he proved that Einstein's theory has a little wrong. However, human beings always need to constantly put forward new theories in an exploratory way. Even if they are not perfect, they are also the steps to promote scientific and technological progress. In this book, discuss the miraculous phenomenon in 30 degrees north latitude, the laws of large scale-scale war victory and defeat and political situation changes, the electromagnetic waves influence biological evolution and life span, the novel coronavirus origin and popularity duration, the quantum entanglement and dark energy new explanation, they all are unsolved mysteries in the world today. It is necessary to boldly put forward new theories to understand the most forefront hot topics of science.

I am a physics enthusiast. I am a professor in Guangdong Preschool Normal College in Mao Ming. I graduated from Hua Zhong University of Science and Technology with a master's degree. I have published 58 papers and won 4 invention patents. I like to study physics and biology, I have practice Qigong exercise for more than 30 years, and can perceive everything in the world in relaxed state. For example, the sun entered none sunspot period on November 14, 2019, and none sunspot period lasted until December 23. The 40 day "none

sunspot” period coincided with the COVID-19 epidemic situation that began in December 2019. At that time, I obviously felt the strong infrasound wave, which was generated in the area prone to light vortex and spread far away. Later, I wrote a paper: “The Sunspot Cycle Leads to Origin and Epidemic Mechanism of New Coronavirus COVID-19”, published in *Natural Science*, 2020 (10), proposed the reasoning that light vortices generate a special amplified energy field to promote virus mutation to produce novel coronavirus, and the area marked in the figure that can generate strong light vortices is consistent with the earliest occurrence area and epidemic distribution area of novel coronavirus. Via statistical analysis, the mortality rate in the light vortex area is much higher than that in the non light vortex area. I proposed preventive measures. I sent my English version papers to the World Health Organization, WHO chief Dr Tedros Adhanom Ghebreyesu immediately delivered a televised speech saying: “I have read some papers and reaffirmed that novel coronavirus comes from nature.” Later, the World Health Organization also organized experts to visit Wuhan and specially arranged to live at the lakeside of Wuhan which is easy to engender light vortex to research.

I have published five papers before: 1. Research on the generation and epidemic mechanism of viruses caused by sunspot cycles, 2. The mysterious mystery in 30 degrees north latitude caused by the sweeping force and hydrodynamic effects of sunlight sweeping the earth, 3. Research on the impact of high-speed sun light sweeping the earth’s surface influence the earth’s war and political situation, 4. Research on the macro impact of the trend of solar light pressure formed by the earth’s tilt and rotation on the war, 5. one kinds of machines that can make people live more one hundred years. They constitute the main structure of my book. In addition, Chapter Three collects other people’s research finding of sunspot cycles affecting everything on earth. Chapter Five discusses that houses and city geographical layout should adapt to the potential energy field that generated by the sun sweeping the earth. Chapter Seven discusses the essence of quantum entanglement and dark energy based on the

above existing phenomena, so constitute a coherence science book with original theoretical. I hope to get the attention of the society and your correction, so it can help solve the unsolved mysteries of the world.
