<b>Biography.....</b>	<b>I</b>
<b>Chapter I. Introduction.....</b>	<b>1</b>
1 Selection basis.....	1
2 Research significance.....	2
3 Literature review.....	3
4 Research assumptions.....	33
5 Research object and research method.....	34
6 Study limitations.....	52
Summary of this chapter.....	52
<b>Chapter II. College (1-4) Grade Sports Games.....</b>	<b>53</b>
1 Game content.....	53
2 Game selection and training plan formulation.....	112
Summary of this chapter.....	113
<b>Chapter III. Research Results.....</b>	<b>115</b>
1 Data analysis results of sports games with different exercise intensity on health fitness.....	115
2 Data analysis results of sports games with different exercise intensity on body composition.....	122
3 Data analysis results of sports games with different exercise intensity on cardiopulmonary endurance.....	126
4 Results of data analysis of blood biochemical indexes in sports games with different exercise intensities.....	128
5 Data analysis results of anti oxidation system in sports games with different exercise intensity.....	130
<b>Chapter IV. The Influence of Sports Games of Different Intensities on College Students' Physical Ability, Antioxidant System and Blood Biochemical System.....</b>	<b>133</b>

1 Research on the influence of sports games with different exercise intensity on health fitness.....	133
2 Research on the influence of sports games with different exercise intensity on body composition.....	139
3 Research on the influence of sports games with different exercise intensity on cardiopulmonary endurance.....	150
4 Effects of sports games with different exercise intensity on blood biochemical indexes.....	154
5 Research on the effect of sports games with different exercise intensity on anti oxidation system.....	163
<b>Chapter V. Conclusion.....</b>	<b>171</b>
<b>References.....</b>	<b>175</b>
