**<http://www.scirp.org/journal/cn>**

CN, an international journal, dedicates to the latest advancement of communications and network technologies. The goal of this journal is to keep a record of the state-of-the-art research and promote the research work in these fast moving areas.

All manuscripts submitted to CN must be previously unpublished and may not be considered for publication elsewhere at any time during CN's review period. Additionally, accepted ones will immediately appear online followed by printed in hard copy. The topics to be covered by Communications and Network include, but are not limited to:

- |   |   |
|---|---|
| ◆ Algorithms and Programs                                     | ◆ Mobility Networks and Protocols                           |
| ◆ Applications and Value-Added Services                       | ◆ Modulation/Signal Design                                  |
| ◆ Cognitive Radio   | ◆ Multi Antenna/User Systems                                |
| ◆ Communication Protocols                                     | ◆ Multimedia Services in Wireless Networks                  |
| ◆ Complexity  | ◆ Network Protocol, QoS and Congestion Control              |
| ◆ Computer and Network Security                               | ◆ Operations and Management                                 |
| ◆ Cooperative Communications                                  | ◆ Optical Communications                                    |
| ◆ Data and Information Security                               | ◆ Overlay and Peer-to-Peer Networks                         |
| ◆ Error Correcting Codes                                      | ◆ Self-Stabilization, Autonomic Computing                   |
| ◆ Fading/Equalization   | ◆ Shared and Transactional Memory, Synchronization          |
| ◆ Green Technology  | Protocols, Concurrent Programming                           |
| ◆ Hardware and Software System Architecture                   | ◆ Simulation/Analytical Evaluation of Communication Systems |
| ◆ High Performance Computing, Grid Computing, Cloud Computing | ◆ Source Coding/Data Compression                            |
| ◆ Internet/Intranet Protocols                                 | ◆ Switching and Routing                                     |
| ◆ Internet/Intranet Services                                  | ◆ Synchronization   |
| ◆ Location Based Services                                     | ◆ Traffic Diagnosis   |
| ◆ Mobile and Portable Communications Systems                  | ◆ Transmission and Access Systems                           |
| ◆ Mobile Computing Systems                                    | ◆ Wired and Wireless Integration                            |
|   | ◆ Wireless Network Design and Performance Evaluation        |

We are also interested in short papers (letters) that clearly address a specific problem, and short survey or position papers that sketch the results or problems on a specific topic. Authors of selected short papers would be invited to write a regular paper on the same topic for future issues of the CN.
