**Open Journal of Polymer Chemistry (OJPChem)** is an international peer-reviewed, open-access journal dedicated to the latest advancement of polymer chemistry. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and perspectives in polymer chemistry and related disciplines.

## Subject Coverage

The journal publishes original papers including but not limited to the following fields:

- Biopolymers
- Chemical Modifications of Natural and Synthetic Polymers for New End-use Applications
- Functional Polymers
- Polymer Physical Chemistry Synthesis and Properties of Macromolecules
- Synthetic Polymers

We are also interested in: 1) Short Reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book Reviews—Comments and critiques.

## Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submission, please access the website.
