Journal of Immune Based Therapies, Vaccines and Antimicrobial (JIBTVA) encompasses all clinical- and research-based aspects of immune based therapies, vaccines and antimicrobials. JIBTVA is an open access, peer-reviewed, online journal dedicated to all aspects of therapeutic and prophylactic applications of immunology and microbiology.

Editor in Chief

Dr. Ronald B. Moss

NexBio Inc., USA

Subject Coverage

The aims of the JIBTVA are to advance the understanding and application of specific immunological mechanisms, the role of antigens and antigenic epitopes in eliciting biological responses, immune correlates of protection and activity, strategic regulatory and clinical development considerations, adjuvant development and strategies for use, formulations, delivery and devices associated with various immune and antimicrobial therapies as well as other issues and findings relating to accelerating the discovery and advance development through licensure, distribution and use of efficacious vaccines, immune based therapies (IBTs) and antimicrobials. The areas of vaccines, IBTs, and antimicrobials encompass a variety of disciplines, including infectious diseases, transplantation, cancer, allergic disorders, and autoimmune diseases.

- Allergic Diseases
- Autoimmune Diseases
- Cancer
- Infectious Diseases
- Transplantation
- Vaccines

We are also interested in: 1) Short reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book reviews—Comments and critiques.

Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.
