Open Journal of Antennas and Propagation (OJAPr) is an open access journal published quarterly. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments about analysis, design, development, measurement and applications in the research of antennas and propagation.

All manuscripts must be prepared in English, and are subject to a rigorous peer-review process. Accepted papers will immediately appear online followed by printed in hard copy. The areas covered by Open Journal of Antennas and Propagation (OJAPr) include but are not limited to the following fields:

- Active and Adaptive Antennas
- Antennas Analysis and Design
- Antennas and Propagation Radiation
- Antennas Array
- Antennas Directivity
- Antennas Measurement
- Antennas Radome
- Antennas Signal Processing and Control
- Antennas Simulation
- Applications of Antennas in Propagation
- Beam Control and Steering
- Channel Modeling
- Electromagnetic Waves Propagation
- Experimental Advances in Antennas and Propagation
- Intelligent Antenna
- Method of Moment
- Microwave Antennas Techniques
- Millimeter-Wave Techniques
- Novel Antennas
- Properties and Selection of Antennas
- Radio Wave Propagation
- Theoretical Research of Antennas and Propagation
- Various Antenna Systems
- Wireless Communications

We are also interested in: 1) Short reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book reviews—Comments and critiques.
