

Table of Contents

Volume 6 Number 3

February 2015

Gas-Dust Protoplanetary Disc: Modeling Collisional Interaction of Primordial Bodies	
M. Ya. Marov, A. V. Rusol.....	181
Relativized Quantum Physics Generating <i>N</i>-Valued Coulomb Force and Atomic Hydrogen Energy Spectrum	
W. J. Christensen Jr.....	194
Gravitational Signature of Matter-Antimatter Interaction	
S. Al Dallal, W. J. Azzam, M. de Fez.....	201
Inconsistencies in Theoretical Physics, with Focus on the Higgs Mechanism	
T. L. Wilson.....	214
The Nature of Dark Matter and of Dark Energy	
J. Schaf.....	224
Accelerating Expansion in a Closed Universe	
M. Tamm.....	239
How to Demonstrate the Lorentz Factor: Variable Time v.s. Variable Inertial Mass	
O. Serret.....	252
Mach's Principle, Action at a Distance and Cosmology	
H. Fearn.....	260
Scattering Cross-Sections in Quantum Gravity—The Case of Matter-Matter Scattering	
C. Wiesendanger.....	273
Prediction and Derivation of the Hubble Constant from Subatomic Data Utilizing the Harmonic Neutron Hypothesis	
D. W. Chakeres, R. Vento.....	283
A Modified Method for Deriving Self-Conjugate Dirac Hamiltonians in Arbitrary Gravitational Fields and Its Application to Centrally and Axially Symmetric Gravitational Fields	
M. V. Gorbatenko, V. P. Neznamov.....	303
The Interacting Generalized Ricci Dark Energy Model in Non-Flat Universe	
M. Suwa, K. Kobayashi, H. Oshima.....	327
Experimental Test of General Relativity and the Physical Metric	
Y. Tomozawa.....	335
Ideas on an Alternative Cosmological World Model with Different Initial Conditions	
G. Zbiral.....	346
