Special Issue on Algorithms in Mathematical Finance

Call for Papers

Mathematical finance covers the fields of computational finance and financial engineering. The latter focuses on applications and modeling, often by help of stochastic asset models, while the former focuses, in addition to analysis, on building tools of implementation for the models. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of algorithms in mathematical finance.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore algorithms in mathematical finance. In this special issue, potential topics include, but are not limited to:

- Risk and portfolio management
- Mathematical tools in finance
- Algorithms in mathematical finance
- Derivatives pricing
- Portfolio modelling
- Financial mathematical models

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly specify the “Special Issue” under your manuscript title. The research field “Special Issue – Algorithms in Mathematical Finance” should be selected during your Submission.

Special Issue timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>September 19th, 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td>Publication Date</td>
<td>November 2019</td>
</tr>
</tbody>
</table>
