Special Issue on Labor Force Supply

Call for Papers

"The rising size of the global workforce presents an opportunity to drive economic expansion and increase gross domestic product (GDP), but it also presents many challenges. About two-thirds of the world’s population, or 4.6 billion people in total, are of working age in 2011, the highest share in the last 60 years. The United Nations projects that the potential labor force will continue to grow through the second half of the century."

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring labor force supply. Potential topics include, but are not limited to:

- Data & statistics
- Labor markets
- Labor force participation
- Employment rate
- Employment by education level
- Temporary employment
- Labor movement

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at Paper Submission System.

Please kindly specify the “Special Issue” under your manuscript title. The research field “Special Issue – Labor Force Supply” should be selected during your submission.

Special Issue timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>September 27th, 2018</th>
</tr>
</thead>
<tbody>
<tr>
<td>Publication Date</td>
<td>November 2018</td>
</tr>
</tbody>
</table>
