Special Issue on Production Planning and Control

Call for Papers

Under the market conditions of excessive production, diversified and individualized customer demand, reasonable and effective production planning and scheduling methods become particularly important for the development of enterprise production. When enterprises make production plans according to orders, they must take into account the constraints of overall and partial production capacity and production schedule, so that the whole production plan can be integrated in order to find the optimal production plan, and control the execution of the plan in real time, so as to respond to the market quickly and satisfy customers' requirements.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring production planning and control. Potential topics include, but are not limited to:

- Production management
- Production forecast
- Material requirement planning
- Cost control
- Inventory analysis and control
- Production scheduling
- Project schedule planning and control
- Production system and operations strategy

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly notice that the “Special Issue” under your manuscript title is supposed to be specified and the research field “Special Issue – Production Planning and Control” should be chosen during your submission.

According to the following timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>March 20th, 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td>Publication Date</td>
<td>May 2019</td>
</tr>
</tbody>
</table>
