Special Issue on Maize AND Sorghum

Call for Papers

Maize research covers in facilitating the deployment of improved maize seed in the tropics, especially targeting women farmers and disadvantaged groups to maximize impact. Work includes identification of easy-to-produce, best-bet hybrids and improved open-pollinated varieties, seed production. The research aims to develop genetically diverse, high-yielding maize germplasm, combining abiotic and biotic stress resilience, nutrient use efficiency, enhanced nutritional quality, and desirable seed production properties, for target production zones. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of maize and sorghum.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore maize and sorghum. In this special issue, potential topics include, but are not limited to:

- Growing environment of maize and sorghum
- Growth period of maize and sorghum
- Cultivation techniques of maize and sorghum
- Disease control of maize and sorghum
- Structure and physiology of maize and sorghum
- Genetic and breeding of maize and sorghum

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly specify the “Special Issue” under your manuscript title. The research field “Special Issue – Maize and Sorghum” should be selected during your Submission.

Special Issue timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>June 13th, 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td>Publication Date</td>
<td>August 2019</td>
</tr>
</tbody>
