Special Issue on Animal Husbandry

Call for Papers

Animal husbandry is the branch of science deals with the practice of breeding, farming and care of farm animals such as cattle, dogs, sheep and horses by humans for advantages. Animal husbandry refers to livestock raising and selective breeding. It is a branch of agriculture. Animal husbandry is the management and care of farm animals by humans for profit, in which genetic qualities and behavior, considered to be advantageous to humans, are further developed. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of animal husbandry.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore animal husbandry. In this special issue, potential topics include, but are not limited to:

- Agriculture animal husbandry
- Pastoral animal husbandry
- The grassland animal husbandry
- Animal feed
- Animal breeding
- Animal health

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly specify the “Special Issue” under your manuscript title. The research field “Special Issue - Animal Husbandry” should be selected during your submission.
