**Special Issue on Anesthesia & Perioperative Care**

**Call for Papers**

Anesthesia enables the painless performance of medical procedures that would cause severe or intolerable pain to an unanesthetized patient. Preoperative care is the preparation and management of a patient prior to surgery. It includes both physical and psychological preparation.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring laparoscopic surgery. Potential topics include, but are not limited to:

- General anesthesiology
- Anesthetic agents
- Pain management
- Anesthesia for diagnostic and therapeutic interventions
- Anesthesia and critical care
- Anesthesia and its associated complications
- Perioperative care and management
- Current research in anesthesia and perioperative care

Authors should read over the journal’s Authors’ Guidelines carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at Paper Submission System.

Please kindly specify the “Special Issue” under your manuscript title. The research field “Special Issue – Anesthesia & Perioperative Care” should be selected during your submission.
