Special Issue on Clinical Pharmacology and Toxicology

Call for Papers

Clinical pharmacology is the science of drugs and their clinical use. It is underpinned by the basic science of pharmacology, with an added focus on the application of pharmacological principles and quantitative methods in the real world. It has a broad scope, from the discovery of new target molecules to the effects of drug usage in whole populations.

Clinical toxicology is a discipline within toxicology concerning with the impact of drugs and other chemicals on humans.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on Clinical Pharmacology and Toxicology. Potential topics include, but are not limited to:

- Clinical trials and use of drugs
- Pharmacology and therapeutics
- Toxicology and risk assessment
- Pharmacodynamics and clinical pharmacokinetics
- Drug interactions and drug development
- Inhibits effects
- Insulin resistance
- Drug resistance
- Drugs for inflammation, injury and cancer
- Drugs inducing oxidative stress
- Drug induced diseases and syndrome
- Drugs and complications

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly notice that the “Special Issue” under your manuscript title is supposed to be specified and the research field “Special Issue – Clinical Pharmacology and Toxicology” should be chosen during your submission.

According to the following timetable:

| Submission Deadline | March 26th, 2019 |
