Special Issue on Clinical and Medical Imaging

Call for Papers

Medical imaging is the technique and process of creating visual representations of the interior of a body for clinical analysis and medical intervention, as well as visual representation of the function of some organs or tissues. Medical imaging seeks to reveal internal structures hidden by the skin and bones, as well as to diagnose and treat disease.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on Clinical and Medical Imaging. Potential topics include, but are not limited to:

- Clinical use of magnetic resonance imaging
- Diagnostic imaging
- Computed tomography in diagnosis disease
- Scintigraphy and SPECT
- Positron emission tomography
- Elastography
- Echocardiography
- Neuroimaging
- MRI screening for cancer
- Mammography
- CT angiography

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly notice that the “Special Issue” under your manuscript title is supposed to be specified and the research field “Special Issue – Clinical and Medical Imaging” should be chosen during your submission.

According to the following timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>April 9th, 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td>Publication Date</td>
<td>June 2019</td>
</tr>
</tbody>
</table>
