Special Issue on Quantum Mathematics

Call for Papers

Quantum mathematics promotes a deeper understanding of all fundamental aspects of quantum theory and bridges between theoretical questions, foundational issues, mathematical methods and the continuing evolution of quantum physics. Mathematical methods and insights that lead to better understanding of the paradoxical aspects of quantum physics and to its expansion into new domains. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of quantum mathematics.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore quantum mathematics. In this special issue, potential topics include, but are not limited to:

- Evolution of quantum physics
- Mathematical methods in quantum theory
- General quantum equation
- Postulates of quantum mechanics
- Schrodinger wave equation
- Hilbert space

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly specify the “Special Issue” under your manuscript title. The research field “Special Issue - Quantum Mathematics” should be selected during your submission.

Special Issue timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>May 8th, 2018</th>
</tr>
</thead>
<tbody>
<tr>
<td>Publication Date</td>
<td>July 2018</td>
</tr>
</tbody>
</table>
