Special Issue on Antimicrobial Drugs

Call for Papers

Before the discovery of antimicrobial drugs, bacterial infection is a serious threat to the human health and life. The emergence of natural antibacterials and synthetic antibacterials makes it possible to treat various bacterial infections effectively. However, with the widespread use of antibiotics, bacterial resistance has increased year by year. The development history of antimicrobial is also the development history of bacterial resistance to antimicrobial. Along with the powerful anti-infective effect of antimicrobial, the problem that the resistance of bacteria and other pathogens to antibiotics has become increasingly apparent.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring antimicrobial drugs. Potential topics include, but are not limited to:

- Antibiotics
- Development of new antimicrobial drugs
- Rational use of antimicrobial drugs
- Anti-bacterial drugs, antifungal and antiviral drugs
- Vaccination
- Residual harm of antimicrobial drugs
- Application status of antimicrobial drugs
- Pathogen resistance and management

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly notice that the “Special Issue” under your manuscript title is supposed to be specified and the research field “Special Issue – Antimicrobial Drugs” should be chosen during your submission.

According to the following timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>March 27th, 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td>Publication Date</td>
<td>May 2019</td>
</tr>
</tbody>
</table>
