Special Issue on Brain Tumor Research

Call for Papers

A brain tumor occurs when abnormal cells form within the brain. There are two main types of tumors: malignant or cancerous tumors and benign tumors. Cancerous tumors can be divided into primary tumors, which start within the brain, and secondary tumors, which have spread from elsewhere, known as brain metastasis tumors. Treatment may include some combination of surgery, radiation therapy and chemotherapy.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on Brain Tumor Research. Potential topics include, but are not limited to:

- Pathology
- Symptoms and causes
- Diagnosis and treatments
- Surgery and medical imaging
- Meningiomas
- Intracranial tumor
- Brain metastasis tumors

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly notice that the “Special Issue” under your manuscript title is supposed to be specified and the research field “Special Issue – Brain Tumor Research” should be chosen during your submission.

According to the following timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>June 7th, 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td>Publication Date</td>
<td>August 2019</td>
</tr>
</tbody>
</table>
