Special Issue on

Environmental Pollutant Monitoring and Analysis

Call for Papers

Environmental pollution monitoring is to track the changes of environmental quality and determine the level of environmental quality through the detection of the contents and emissions of various substances that have an impact on human beings and the environment. So as to provide the basis and guarantee for environmental management, pollution control and other work. All the monitoring strategies and programmes have justifications which are often designed to establish the current status of an environment or the trends in environmental parameters. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of environmental pollutant monitoring and analysis.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring environmental pollutant monitoring and analysis. Potential topics include, but are not limited to:

- Heavy metals detection
- Waste water analysis
- Exhaust gas analysis
- Pesticide residue analysis
- Odor pollutant analysis
- Poisonous waste analysis
- Light pollution analysis
- Emerging pollutants analysis and assessment

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly notice that the “Special Issue” under your manuscript title is supposed to be specified and the research field “Special Issue – Environmental Pollutant Monitoring and Analysis” should be chosen during your submission.

According to the following timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>December 27th, 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td>Publication Date</td>
<td>February 2020</td>
</tr>
</tbody>
</table>
