Special Issue on Actuarial Science and Finance

Call for Papers

Actuarial Science includes a number of interrelated subjects, including mathematics, probability theory, statistics, finance, economics, and computer science. Actuarial science applies mathematical skills to the social sciences to solve important problems for insurance, government, commerce, industry and academic researchers.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring actuarial science and finance. Potential topics include, but are not limited to:

- Stochastic models
- Risk management
- Life, health and pension insurance
- Risk and stochastic control
- Statistical and computational methods
- Financial theory and practice

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at Paper Submission System.

Please kindly specify the “Special Issue” under your manuscript title. The research field “Special Issue – Actuarial Science and Finance” should be selected during your submission.
