Special Issue on Fuzzy Logic and Intelligent Systems

Call for Papers

Fuzzy logic is a form of many-valued logic in which the truth values of variables may be any real number between 0 and 1. It is employed to handle the concept of partial truth, where the truth value may range between completely true and completely false. Fuzzy logic is used in solving many real engineering problems and applied to Intelligent Systems.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on fuzzy logic and intelligent systems. Potential topics include, but are not limited to:

- Fuzzy neural network
- Artificial intelligence and computational intelligence
- Intelligent control and fuzzy control
- Data analysis and fuzzy logic
- Fuzzy clustering analysis
- Fuzzy model for prediction
- Fuzzy logic and management system
- Fuzzy theory and its applications

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly notice that the “Special Issue” under your manuscript title is supposed to be specified and the research field “Special Issue – Fuzzy Logic and Intelligent Systems” should be chosen during your submission.

According to the following timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>February 28th, 2018</th>
</tr>
</thead>
<tbody>
<tr>
<td>Publication Date</td>
<td>April 2018</td>
</tr>
</tbody>
</table>
