Special Issue on Porous Materials

Call for Papers

Porous Materials are ubiquitous in many energy-related applications in recent years. There are various forms of porous media, such as carbonate rock, percolation cluster, packed particles, metal foams, etc., which are either widely distributed in the natural environment or carefully designed for industrial functions. This special issue will be focused on studying different kinds of porous materials and their applications.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring porous materials. Potential topics include, but are not limited to:

- Emulsion templating and colloidal crystal
- Metal-organic frameworks
- Computational approaches
- Ion exchange and molecular sieving
- Porous medium
- Synthesis of porous materials
- Characterization and processing of porous materials
- Application of porous materials

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly notice that the “Special Issue” under your manuscript title is supposed to be specified and the research field “Special Issue - Porous Materials” should be chosen during your submission.

According to the following timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>October 28th, 2014</th>
</tr>
</thead>
<tbody>
<tr>
<td>Publication Date</td>
<td>December 2014</td>
</tr>
</tbody>
</table>
