Special Issue on Construction and Building Materials

Call for Papers

Building material is any material which is used for construction purposes. Many naturally occurring substances, such as clay, rocks, sand, and wood, even twigs and leaves, have been used to construct buildings. Apart from naturally occurring materials, many man-made products are in use, some more and some less synthetic.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on Construction and Building Materials. Potential topics include, but are not limited to:

- Sustainability, strength and durability of building materials
- Mechanical properties and performance
- Concrete technology and processing methods
- Modeling, testing and risk assessment
- Nanotechnology in construction materials
- Repair materials and strengthening methods
- Thermal, moisture and corrosion protection
- Man-made substances

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly notice that the “Special Issue” under your manuscript title is supposed to be specified and the research field “Special Issue – Construction and Building Materials” should be chosen during your submission.

According to the following timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>October 24th, 2018</th>
</tr>
</thead>
<tbody>
<tr>
<td>Publication Date</td>
<td>December 2018</td>
</tr>
</tbody>
</table>
